---

Nick:

The wind direction is from the North to the South at 1 to 2 mph. 95 deg, Clear, 20% Chance of Rain. Rain chances go up to 40% on Sunday at about 5pm with higher chances on M, T, and W.

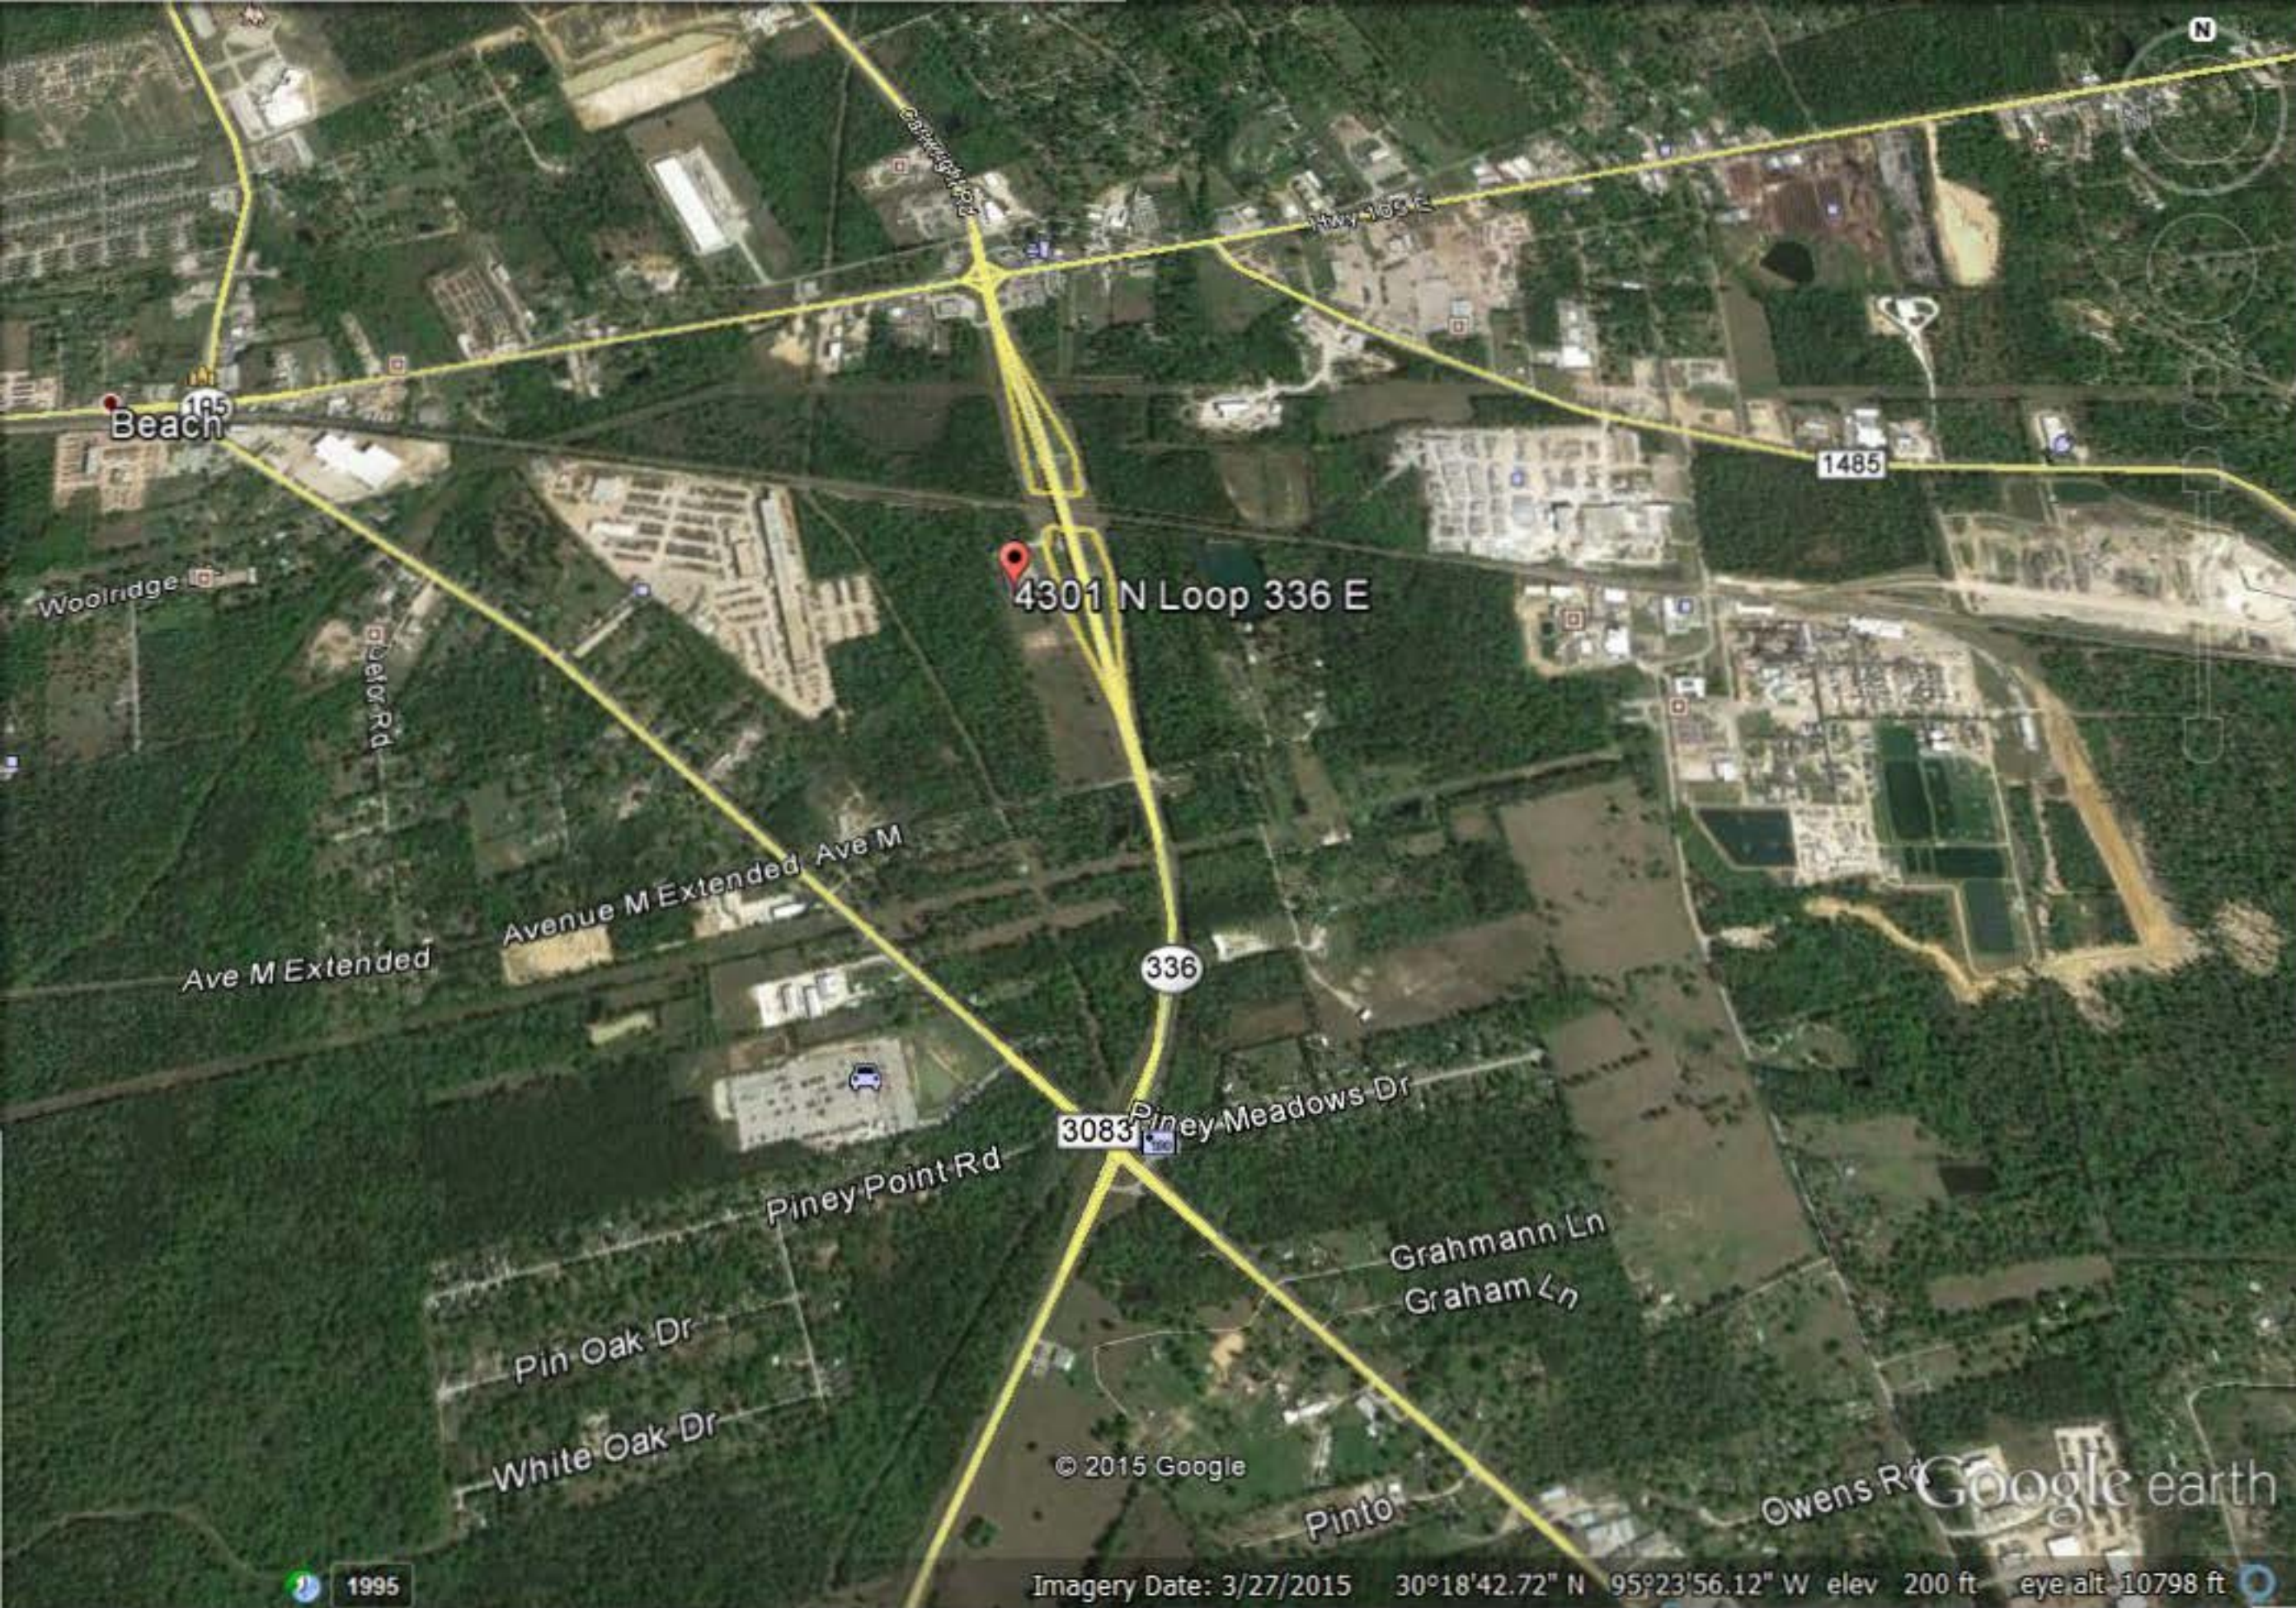

This appears to be a primarily commercial/ industrial area with pockets of residential properties in a more county setting. The closet downwind is about 1/3 of a mile with a larger pocket at about ¾ of a mile.

Here are some pics.
